HWAG TARGET AUDIENCE

REPORT ON THEIR PORTRAIT AND REQUEST FOR ASSISTANCE

DECEMBER 2025

PREPARED BY DARIA IVCHENKO

Research objectives

- Getting an up-to-date idea of the target audience;
- Understanding of target audience’s decision making towards assistance in a job search;
- Identifying informants' preferences regarding assistance formats;
- Determining willingness to pay in general and for a subscription in particular;
- Identifying factors that may contribute to an organization's acquisition of paid subscriptions.

PREPARED BY DARIA IVCHENKO

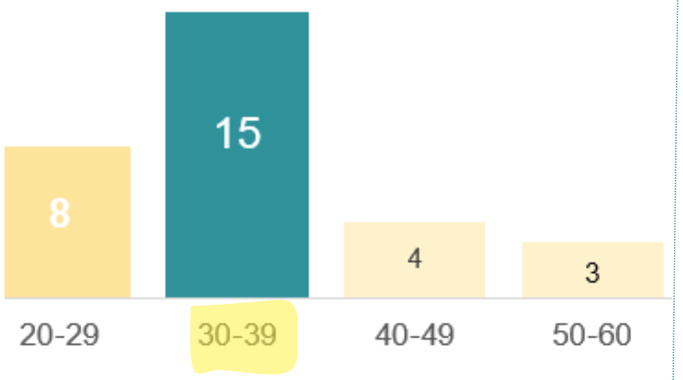
Target audience portrait

THE STUDY INVOLVED 30 PEOPLE, MOST OF THEM **WOMEN**, WHO HAD BEEN LIVING **IN DENMARK FOR 1 TO 5 YEARS** AND **WERE AGED 30 TO 39.**

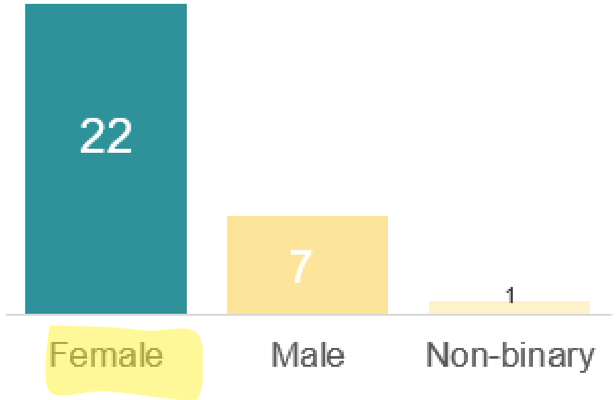
THE SKEWED DATA MAY REFLECT BOTH TRENDS IN THE DANISH LABOR MARKET AND POSSIBLE RESEARCH BIAS DURING DATA GATHERING PART.

THE ABOVE ARE LIMITATIONS OF THIS STUDY.

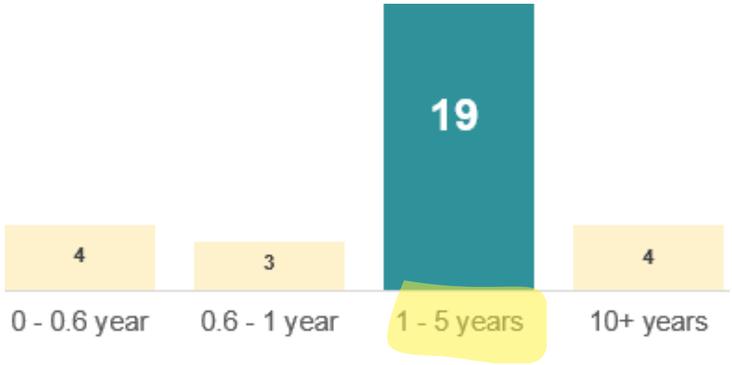
AGE



GENDER



LENGTH OF RESIDENCE IN DK



DECEMBER 2025

PREPARED BY HARPER RUSSO

Readiness to pay for assistance

80%

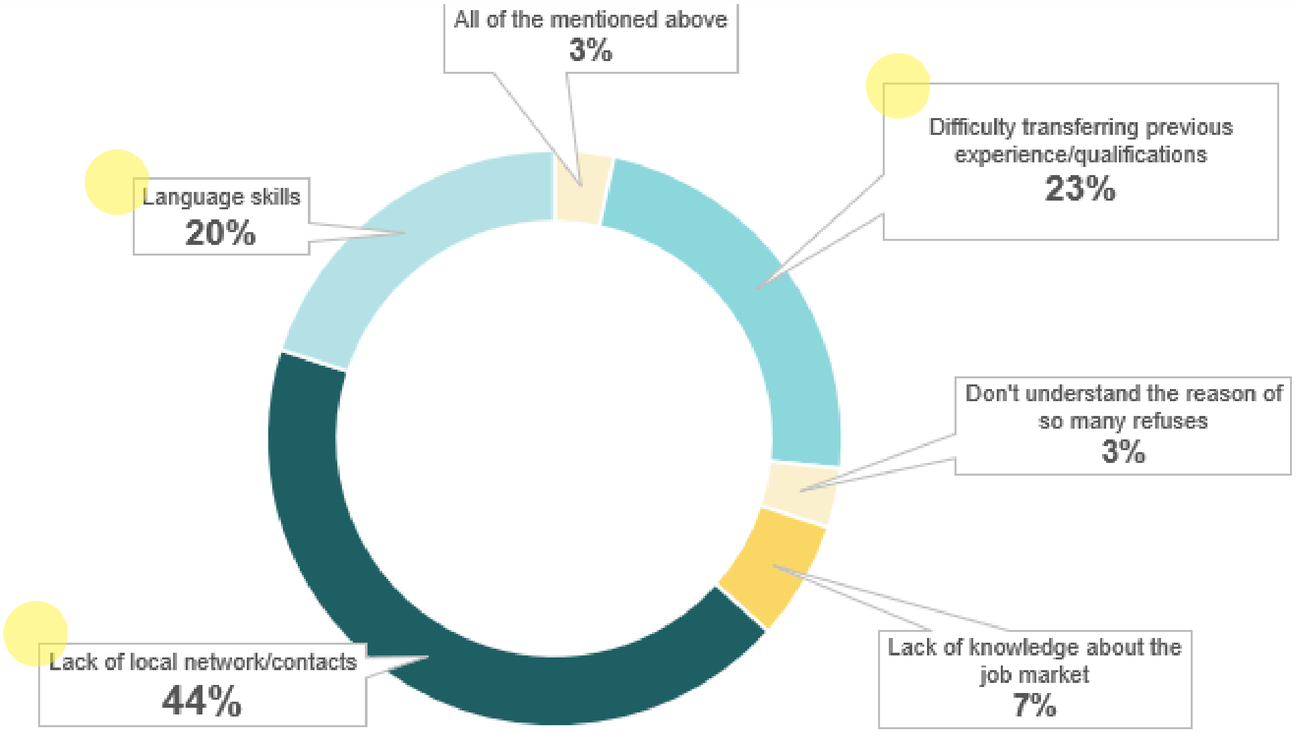
RESPONDENTS
FEEL THE NEED FOR ASSISTANCE
IN FINDING A JOB

TWO-THIRDS OF RESPONDENTS WOULD LIKE TO CONTINUE THEIR CURRENT CAREER TRAJECTORY, HOWEVER, SOME OF THEM ARE UNCERTAIN OR OPEN TO NEW OPPORTUNITIES.

SAME CAREER (CATEGORY)	UNCERTAIN	OTHER CAREER	SAME CAREER (N)
No	4	6	0
Yes	6	3	21
All	10	9	21

PREPARED BY DARIA IVCHENKO

Main barriers to finding a job



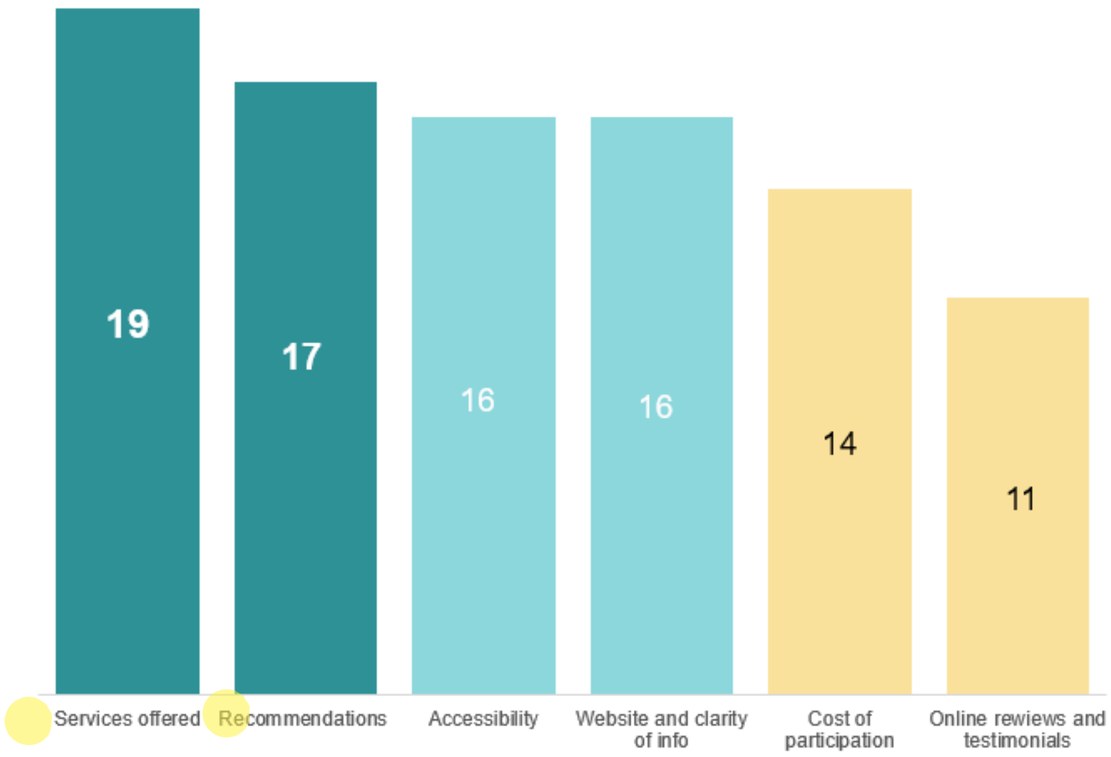
ALMOST HALF OF THE RESPONDENTS CHOSE LACK OF LOCAL NETWORK/CONTACTS AS THE MAIN BARRIER IN CAREER-BUILDING IN DENMARK (44%).

A QUARTER OF RESPONDENTS NOTED DIFFICUTY TRANSFERRING PREVIOS EXPERIENCE (23%) AND LANGUAGE SKILLS (20%) AMONG THE OTHER IMPORTANT BARRIERS.

DECEMBER 2025

PREPARED BY DARIA IVCHENKO

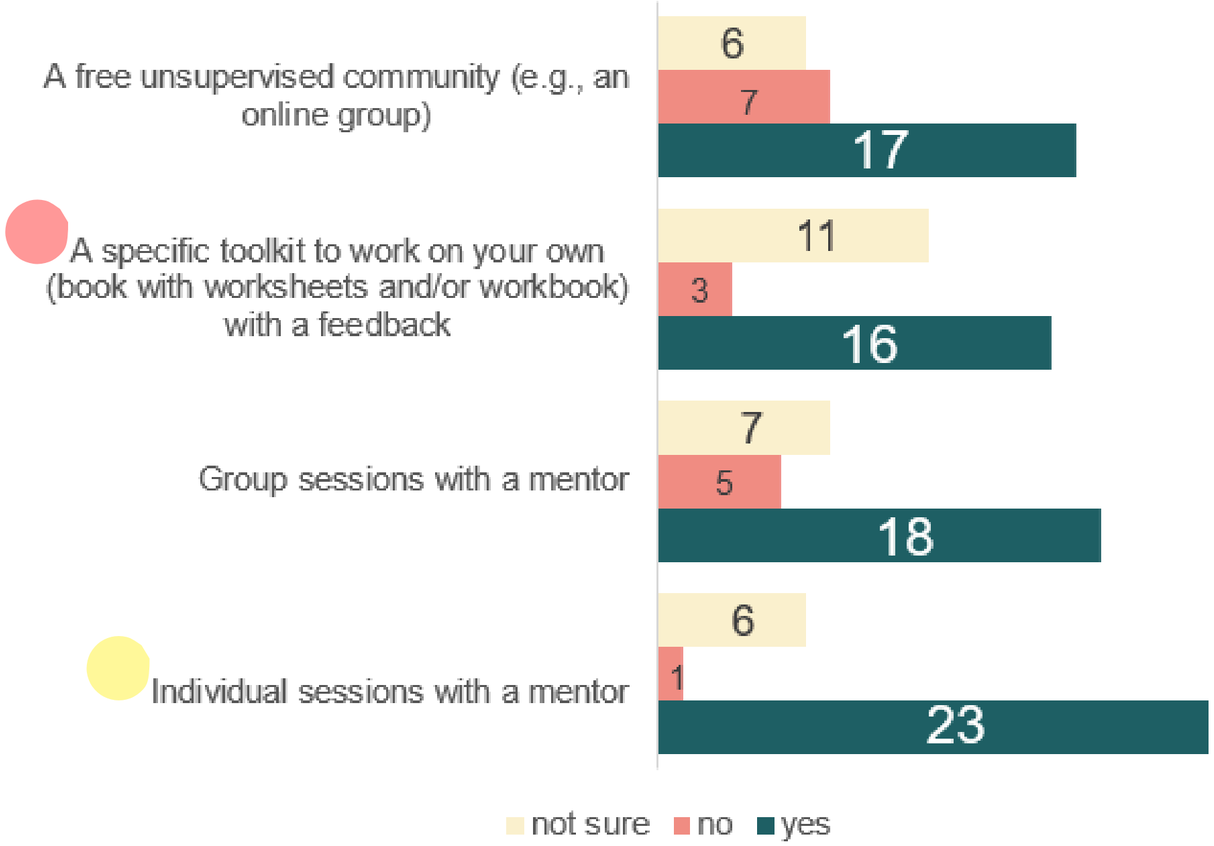
Priorities in decision making towards helping organization



TWO-THIRDS OF RESPONDENTS CONSIDER THE SERVICES PROVIDED TO BE DECISIVE IN CHOOSING A HELPING ORGANIZATION.

A LITTLE BIT LESS PARTICIPANTS PAY ATTENTION TO RECOMMENDATIONS FROM FRIENDS/OTHER EXPATS; ACCESSIBILITY (LOCATION, ONLINE/OFFLINE, OPENING HOURS) AND WEBSITE AND CLARITY OF INFORMATION PROVIDED.

Types of assistance: usefulness



MOST RESPONDENTS INDICATED THAT **EACH** SUPPORTING **FORMAT** OF ASSISTANCE **WAS USEFUL**.

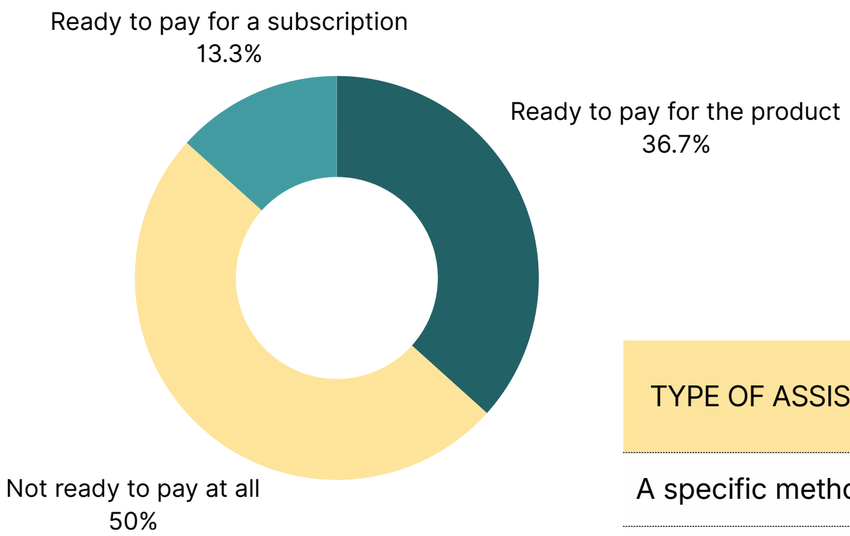
HOWEVER, **SOME** SUPPORT FORMATS SEEMED **MORE STRAIGHTFORWARD,** WHILE **OTHERS** RAISED **MORE DOUBTS.**

ONE OF THE **MOST** CLEARLY **USEFUL** FORMS OF SUPPORT IS **INDIVIDUAL SUPERVISION** WHILE THE **MOST UNCLEARLY** – A **SPECIFIC TOOLKIT** TO WORK ON YOUR OWN.

DECEMBER 2025

PREPARED BY DARIA IVCHENKO

Readiness to pay for assistance



HALF OF THE RESPONDENTS IS NOT READY TO PAY FOR THE ASSISTANCE.

THOSE, WHO ARE, PREFER TO PAY FOR THE PRODUCT THAN FOR MONTHLY SUBSCRIPTION.

MONTHLY INDIVIDUAL SESSIONS IS A MOST POPULAR TYPE OF ASSISTANCE.

TYPE OF ASSISTANCE	SUBSCRIPTION	PRODUCT	ALL
A specific methodology	2	4	6
List of expat-friendly vacancies or refferals	1	0	1
Monthly individual sessions with a mentor	1	7	8
All	4	11	15

PREPARED BY DARIA IVCHENKO

Preliminary conclusions (1)

1. The study has its limitations and needs to be verified in further research;

2. The majority of job seekers on the Danish market (mainly among Copenhagen's citizens) are women, 30-39 years old, living in Denmark for 1 to 5 years who are interested in continuing a career in their field;

3. About half of respondents consider the lack of local connections to be the main barrier to finding work in Denmark;

4. When choosing a helping organization, respondents take into account the services provided and recommendations from friends; the cost of services is not among the top 3 reasons;

PREPARED BY DARIA IVCHENKO

Preliminary conclusions (2)

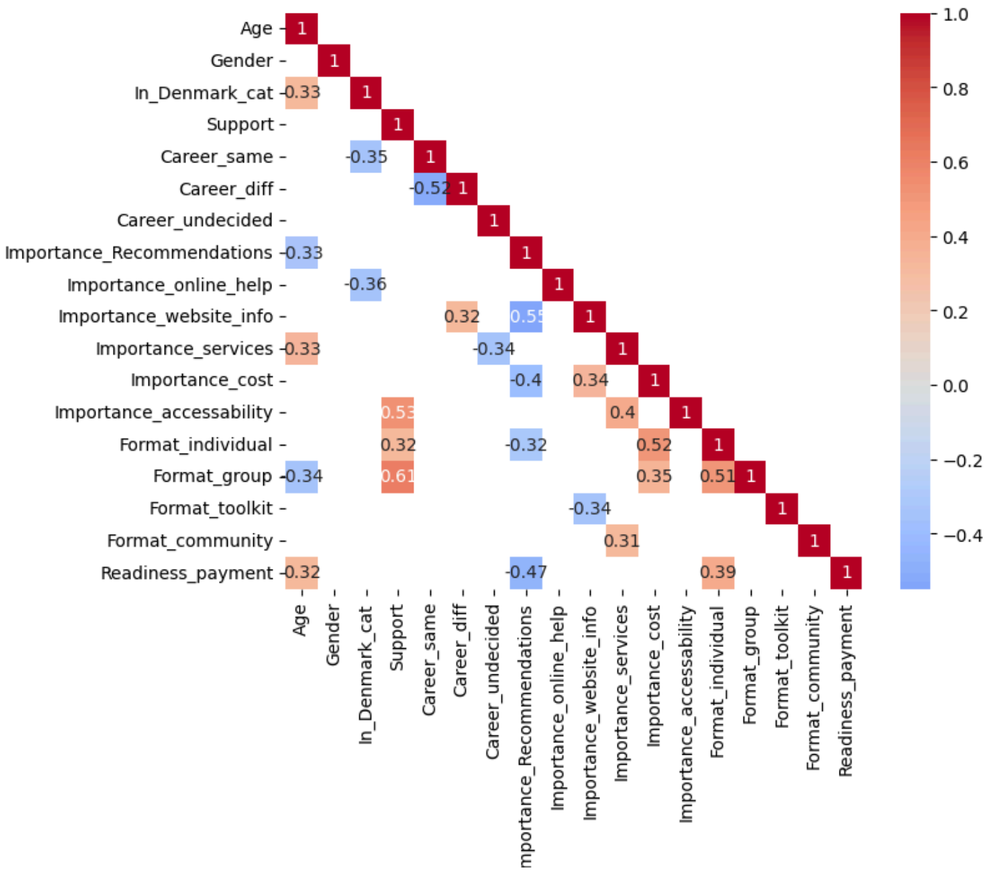
5. Comparing to others, individual sessions with a mentor seem to be the most effective format of assistance;

6. Only half of the respondents surveyed are willing to pay, but for a product, not a subscription.

It seems useful to look at the relationship between different variables and track which factors influence respondents' readiness to pay.

PREPARED BY DARIA IVCHENKO

Relationship of variables



1. NO STRONG RELATIONSHIP WAS FOUND BETWEEN WILLINGNESS TO PAY AND ANY OF THE IDENTIFIED FACTORS.

2. A **SLIGHTLY POSITIVE CORRELATION** WAS OBSERVED BETWEEN **WILLINGNESS TO PAY** AND **PREFERRED INDIVIDUAL ASSISTANCE FORMAT**.

3. A **MODERATELY SIGNIFICANT INVERSE RELATIONSHIP** WAS NOTED BETWEEN **WILLINGNESS TO PAY** AND THE **IMPORTANCE OF FRIEND RECOMMENDATIONS** IN A SEARCH FOR HELPING ORGANISATION.

4. INDIVIDUALS SEEKING EXTERNAL ASSISTANCE OFTEN VALUE GROUP INTERACTION AS AN ASSISTANCE FORMAT, WITH ACCESSIBILITY BEING CRUCIAL WHEN SELECTING A SUPPORT ORGANISATION.

5. THOSE WHO PREFER INDIVIDUAL ASSISTANCE HIGHLIGHTED THE SIGNIFICANT COST OF THE SERVICES PROVIDED.

Identifying the cause-and-effect relationship (logistic regression)

FACTORS INFLUENCING POSITEVELY
Increasing in age..
Choosing same career trajectory...
Mentioning toolkit as a useful format of help...
Choosing Individual or community format of assistance...
Claiming importance of cost of payment and services provided...
Living longer in Denmark...
The fact that the respondent is a woman...

...increases odds ratio of being ready to pay

PREPARED BY DARIA IVCHENKO

Identifying the cause-and-effect relationship (logistic regression)

FACTORS INFLUENCING NEGATIVELY

Choosing group format of assistance...

Claiming the need of support in a job search...

Claiming importance of website information, accessability, online help and recommendations as in decision-making towards helping organization...

Having doubts about career trajectory or choosing different career path...

...decreases odds ratio of being ready to pay

PREPARED BY DARIA IVCHENKO

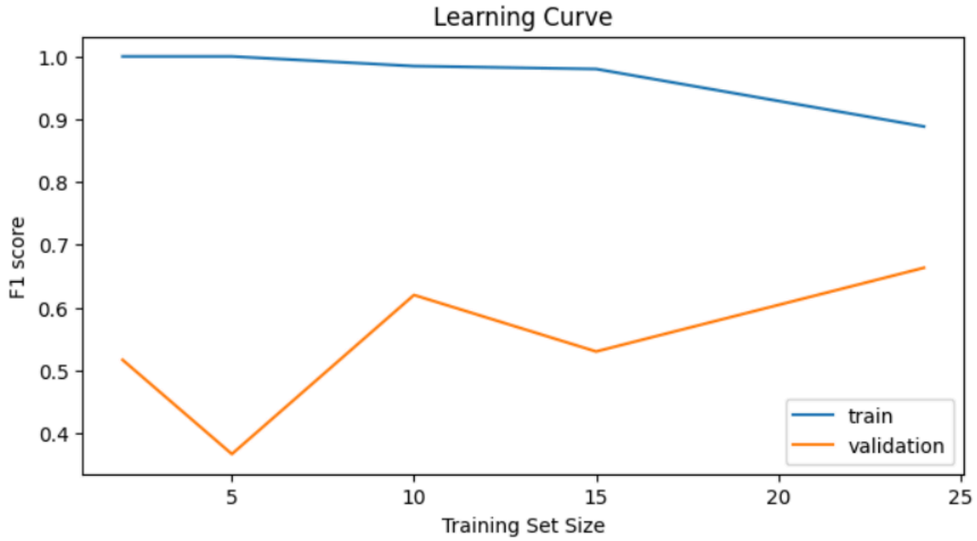
Quality of the model

THE IDENTIFIED DEPENDENCE CAN BE INTERPRETED MEANINGFULLY IF THE QUALITY IS SUFFICIENTLY HIGH (AT LEAST ABOVE 70).

THE **QUALITY METRIC** IN OUR CASE IS **HIGH**.

85,71

METRIC OF QUALITY
F1-SCORE*



*THIS METRIC WAS CHOSEN BECAUSE WE CARE ABOUT BOTH CORRECT POSITIVE PREDICTIONS (PRECISION) AND MINIMIZING MISSED CASES (RECALL)

HOWEVER, ACCORDING TO LEARNING CURVE THE GAP BETWEEN THE METRIC ON THE TRAINING AND VALIDATION SETS IS LARGE. NEVERTHELESS, THEY TEND TO CONVERGE AS NEW DATA IS ADDED.

Recommendations

FURTHER RESEARCH DIRECTION

- quantitative: a short questionnaire after each event with feedback; survey at major events (such as ICD in Kph)
- qualitative: deepening understanding of barriers to subscription purchases through individual interviews.

OPPORTUNITIES

- Product adjustments for sale – individual sessions focusing on unique tools for a monthly subscription and separate sale of a package with useful material.
- Focusing on the target audience when changing the website and managing social media.

THANK YOU
