

HWAG TARGET AUDIENCE

TWO PARTS ANALYSIS

- Part 1 - December 2025
- Part 2 - June 2026

Research questions

- Who are the internationally mobile professionals seeking employment in Denmark — and what characterises their job-search journey?
- What are the main barriers they face in finding a job on the Danish labour market?
- What forms of assistance do they find valuable, and what drives their decision to seek help?
- What factors influence their willingness to pay for assistance?
- How do they perceive organisations like HWAG — and what would make them more likely to engage?

Part 1. Quantitative – generalised scope

DECEMBER 2025

PAGE 3

Target audience portrait

THE STUDY INVOLVED 30 PEOPLE, MOST OF THEM **WOMEN**, WHO HAD BEEN LIVING **IN DENMARK FOR 1 TO 5 YEARS** AND **WERE AGED 30 TO 39**.
THE SKEWED DATA MAY REFLECT BOTH TRENDS IN THE DANISH LABOR MARKET AND POSSIBLE RESEARCH BIAS DURING DATA GATHERING PART.
THE ABOVE ARE LIMITATIONS OF THIS STUDY.

Assistance and career trajectory

TWO-THIRDS OF RESPONDENTS WOULD LIKE TO CONTINUE THEIR CURRENT CAREER TRAJECTORY, HOWEVER, SOME OF THEM ARE UNCERTAIN OR OPEN TO NEW OPPORTUNITIES.

SAME CAREER (CATEGORY)	UNCERTAIN	OTHER CAREER	SAME CAREER (N)
No	4	6	0
Yes	6	3	21
All	10	9	21

Main barriers to finding a job

ALMOST HALF OF THE RESPONDENTS CHOSE LACK OF LOCAL NETWORK/CONTACTS AS THE **MAIN BARRIER** IN CAREER-BUILDING IN DENMARK (44%).

A QUARTER OF RESPONDENTS NOTED DIFFICULTY TRANSFERRING PREVIOUS EXPERIENCE (23%) AND LANGUAGE SKILLS (20%) **AMONG THE OTHER IMPORTANT BARRIERS.**

Priorities in decision making towards helping organization

TWO-THIRDS OF RESPONDENTS CONSIDER THE SERVICES PROVIDED TO BE DECISIVE IN CHOOSING A HELPING ORGANIZATION.

A LITTLE BIT LESS PARTICIPANTS PAY ATTENTION TO RECOMMENDATIONS FROM FRIENDS/OTHER EXPATS; ACCESSIBILITY (LOCATION, ONLINE/OFFLINE, OPENING HOURS) AND WEBSITE AND CLARITY OF INFORMATION PROVIDED.

Types of assistance: usefulness

MOST RESPONDENTS INDICATED THAT **EACH** SUPPORTING **FORMAT** OF ASSISTANCE **WAS USEFUL**.

HOWEVER, **SOME** SUPPORT FORMATS SEEMED **MORE STRAIGHTFORWARD**, WHILE **OTHERS** RAISED **MORE DOUBTS**.

ONE OF THE **MOST** CLEARLY **USEFUL** FORMS OF SUPPORT IS **INDIVIDUAL SUPERVISION** WHILE THE **MOST UNCLEARLY** – A **SPECIFIC TOOLKIT** TO WORK ON YOUR OWN.

Readiness to pay for assistance

HALF OF THE RESPONDENTS IS NOT READY TO PAY FOR THE ASSISTANCE.

THOSE, WHO ARE, PREFER TO PAY FOR THE PRODUCT THAN FOR MONTHLY SUBSCRIPTION.

MONTHLY INDIVIDUAL SESSIONS IS A MOST POPULAR TYPE OF ASSISTANCE.

TYPE OF ASSISTANCE	SUBSCRIPTION	PRODUCT	ALL
A specific methodology	2	4	6
List of expat-friendly vacancies or referrals	1	0	1
Monthly individual sessions with a mentor	1	7	8
All	4	11	15

Preliminary conclusions (1)

1. The study has its limitations and needs to be verified in further research;
2. The majority of job seekers on the Danish market (mainly among Copenhagen's citizens) are women, 30-39 years old, living in Denmark for 1 to 5 years who are interested in continuing a career in their field;
3. About half of respondents consider the lack of local connections to be the main barrier to finding work in Denmark;
4. When choosing a helping organization, respondents take into account the services provided and recommendations from friends; the cost of services is not among the top 3 reasons;

Preliminary conclusions (2)

5. Comparing to others, individual sessions with a mentor seem to be the most effective format of assistance;

6. Only half of the respondents surveyed are willing to pay — and when they are, they prefer a product over a subscription.

It seems useful to look at the relationship between different variables and track which factors influence respondents' readiness to pay.

Relationship of variables

- 1.NO STRONG RELATIONSHIP WAS FOUND BETWEEN WILLINGNESS TO PAY AND ANY OF THE IDENTIFIED FACTORS.
- 2.A **SLIGHTLY POSITIVE CORRELATION** WAS OBSERVED BETWEEN **WILLINGNESS TO PAY** AND **PREFERRED INDIVIDUAL ASSISTANCE FORMAT**.
- 3.A **MODERATELY SIGNIFICANT INVERSE RELATIONSHIP** WAS NOTED BETWEEN **WILLINGNESS TO PAY** AND THE **IMPORTANCE OF FRIEND RECOMMENDATIONS** IN A SEARCH FOR HELPING ORGANISATION.
- 4.INDIVIDUALS SEEKING EXTERNAL ASSISTANCE OFTEN VALUE GROUP INTERACTION AS AN ASSISTANCE FORMAT, WITH ACCESSIBILITY BEING CRUCIAL WHEN SELECTING A SUPPORT ORGANISATION.
- 5.THOSE WHO PREFER INDIVIDUAL ASSISTANCE HIGHLIGHTED THE SIGNIFICANT COST OF THE SERVICES PROVIDED.

Identifying the cause-and-effect relationship (logistic regression)

FACTORS INFLUENCING POSITIVELY

Increasing in age..

Choosing same career trajectory...

Mentioning toolkit as a useful format of help...

Choosing Individual or community format of assistance...

Claiming importance of cost of payment and services provided...

Living longer in Denmark...

The fact that the respondent is a woman...

...increases odds ratio of being ready to pay

Identifying the cause-and-effect relationship (logistic regression)

FACTORS INFLUENCING NEGATIVELY

Choosing group format of assistance...

Claiming the need of support in a job search...

Claiming importance of website information, accessibility, online help and **recommendations** as in decision-making towards helping organization...

Having doubts about career trajectory or choosing different career path...

...decreases odds ratio of being ready to pay

Quality of the model

THE IDENTIFIED DEPENDENCE CAN BE INTERPRETED MEANINGFULLY IF THE QUALITY IS SUFFICIENTLY HIGH (AT LEAST ABOVE 70).

THE **QUALITY METRIC** IN OUR CASE IS **HIGH**.

85,71

METRIC OF QUALITY
F1-SCORE*

*THIS METRIC WAS CHOSEN BECAUSE WE CARE ABOUT BOTH CORRECT POSITIVE PREDICTIONS (PRECISION) AND MINIMIZING MISSED CASES (RECALL)

HOWEVER, ACCORDING TO LEARNING CURVE THE GAP BETWEEN THE METRIC ON THE TRAINING AND VALIDATION SETS IS LARGE. NEVERTHELESS, THEY TEND TO CONVERGE AS NEW DATA IS ADDED.

Part 2. Qualitative – indepth scope

JUNE 2026

PAGE 16

METHODOLOGY

METHODOLOGY: 7 SEMI-STRUCTURED IN-DEPTH INTERVIEWS CONDUCTED IN ENGLISH VIA VIDEO CALLS OR IN PERSON

INTERVIEW STRUCTURE:

OPEN NARRATIVE QUESTIONS + REACTION TO HWAG WEBSITE AND PRODUCTS

RECRUITMENT: CONVENIENCE AND SNOWBALL SAMPLING VIA RESEARCHER'S PERSONAL NETWORK

DURATION: 45–90 MINUTES PER INTERVIEW

PERIOD: JAN - MAY 2026

KEY FINDING — BARRIERS TO EMPLOYMENT

JUNE 2026

QUALITATIVE RESEARCH REVEALS THE HUMAN SIDE BEHIND THE NUMBERS

- **HIDDEN JOB MARKET** — MOST ROLES FILLED THROUGH CONNECTIONS NEVER REACH LISTINGS
- **LANGUAGE BARRIER** — NOT JUST FLUENCY, BUT UNWRITTEN WORKPLACE NORMS AND DANISH-STYLE SELF-PRESENTATION
- **EMOTIONAL BANDWIDTH** — EARLY RELOCATION MONTHS REDUCE CAPACITY TO JOB-SEARCH, REGARDLESS OF MOTIVATION
- **WEAK LOCAL NETWORK** — CONFIRMED AS #1 BARRIER IN BOTH QUANTITATIVE (44%) AND QUALITATIVE RESEARCH

“ IT WOULD BE GREAT IF SOMEONE BROUGHT MY CV TO
THIS GREY JOB MARKET [INT1] ”

KEY FINDING — MOTIVATION & WHAT PEOPLE WILL PAY FOR

80% FEEL NEED FOR **ASSISTANCE**, BUT ONLY 50% **READY TO PAY** → THE GAP IS **EXPLAINED** HERE

WHAT WOULD INSPIRE PEOPLE TO SEEK AND PAY FOR HELP?

- **INDIVIDUAL COACHING** — THE CLEAREST PAID PRODUCT TRIGGER ACROSS 5 OF 7 INTERVIEWS; PEOPLE WANT A STRUCTURED, PERSONALISED PROCESS, NOT GENERAL INSPIRATION
- **PEER COMMUNITY** — "PAYING FOR BELONGING, NOT FOR A SERVICE" · COMMUNITY MUST INCLUDE BOTH INTERNATIONALS AND LOCALS
- **OUTCOME COMMITMENT** — PEOPLE NEED A PROMISE, NOT JUST A DESCRIPTION OF PROCESS: "WE WILL GUIDE YOU TO THE OFFER"
- **PRACTICAL SKILLS** — CV TAILORING, INTERVIEW REHEARSAL, DANISH WORKPLACE NORMS, DIGITAL UPSKILLING

KEY FINDING — THE APP CONCEPT

JUNE 2026

A PEER-NETWORKING APP RESONATED WITH 5 OUT OF 7 INFORMANTS

- **CONCEPT:** TINDER-STYLE MATCHING FOR PROFESSIONAL PEERS IN THE SAME CITY
- **KEY INSIGHT:** FACE-TO-FACE COFFEE MEETINGS VALUED OVER DIGITAL-ONLY CONNECTION
- **FREEMIUM MODEL SUGGESTED:** JOIN FREE TO SEE WHO'S THERE · PAY TO CONNECT AND MESSAGE
- **MIXED COMMUNITY:** LOCALS + INTERNATIONALS · NOT EXPATS ONLY

“

PEOPLE WOULD PAY IF THEY WERE PAYING FOR A
COMMUNITY — NOT GIVING MONEY FOR A SERVICE
BUT BEING PART OF A CLUB [INT5]

”

KEY FINDING — BARRIERS TO BUYING HWAG PRODUCTS

WHY DO PEOPLE HESITATE TO INVEST IN HWAG?

THE BARRIER IS RARELY THE PRICE — IT'S THE **LACK OF CLARITY AND TIMING**

- **UNCLEAR PRODUCT** — PEOPLE STRUGGLE TO UNDERSTAND WHAT COACHING SESSIONS COVER, WHAT THE MEMBERSHIP INCLUDES, WHAT RESULTS TO EXPECT
- **BROAD POSITIONING** — "HOW CAN SOMEBODY KNOW IN DEPTH HOW THE JOB MARKET WORKS IN SO MANY COUNTRIES AND FIELDS?" · SPECIALISTS DISTRUST GENERALIST OFFERINGS
- **TIMING MISMATCH** — EARLY-STAGE INTERNATIONALS LACK BANDWIDTH; SOME (E.G. AUTHORISATION PROGRAMMES) ARE NOT YET IN JOB-SEARCH MODE AT ALL
- **NO SOCIAL PROOF** — SUCCESS STORIES AND TESTIMONIALS ARE ABSENT BUT EXPECTED

KEY FINDING — BRAND PERCEPTION

JUNE 2026

HOW IS HWAG CURRENTLY PERCEIVED?

THE GAP: HWAG IS SEEN AS AN EMOTIONAL SUPPORT ORGANISATION · PEOPLE ARE NOT READY TO PAY FOR EMOTIONAL SUPPORT

✓	✗
General message about IDCC* is attractive	Website design feels industrial. not human, is hard to navigate
Coaching page is clear and relevant when found	Call-to-action messages are weak
	Products described in founder language, not customer

*IDCC - international dual-career couples

LIMITATIONS

1. **SAMPLE SIZE** — 7 INTERVIEWS · FINDINGS ARE DIRECTIONAL, NOT STATISTICALLY GENERALISABLE
2. **CULTURAL COVERAGE** — EASTERN EUROPEAN AND SOUTH/SOUTHEAST ASIAN BACKGROUNDS DOMINATE · TURKISH, MIDDLE EASTERN, AND AFRICAN COMMUNITIES NOT REPRESENTED
3. **RECRUITMENT BIAS** — CONVENIENCE SAMPLING VIA RESEARCHER'S NETWORK · POSSIBLE LOYALTY EFFECT, OFFSET BY GREATER OPENNESS
4. **GEOGRAPHIC CONCENTRATION** — PRIMARILY AARHUS-BASED · COPENHAGEN AND SMALLER TOWNS MAY DIFFER

WHAT DOES QUALITATIVE RESEARCH ADD?

QUANTITATIVE FINDING	QUALITATIVE EXPLANATION
50% not ready to pay — no strong predictor found	Willingness is conditional on outcome clarity, not demographics
Individual sessions rated most useful	People need guided process, not self-navigation
Inverse link: willingness to pay ↓ when recommendations matter	Passive followers not yet ready to commit
Longer in Denmark → more ready to pay	Bandwidth recovers; free options exhausted first
Toolkit format raises most doubts	Self-directed tools feel unsafe without human guidance

Further research directions

QUANTITATIVE

- Short feedback survey after HWAG events
- Broader survey at major expat events (e.g. ICD Copenhagen)
- Separate analysis of messages on LinkedIn and other media

QUALITATIVE

- Interviews with internationals who successfully found a job in Denmark
- Focus groups to test revised website messaging and product descriptions
- Interviews with Turkish, Middle Eastern, and African internationals to broaden cultural coverage

Recommendations

PRODUCT

- Lead with individual coaching as the primary paid offer · make outcomes explicit and specific
- Develop a freemium peer-networking app with mixed local/international community
- Add a skills self-assessment tool as an entry-point product

COMMUNICATION

- Reposition from emotional support → results-oriented guidance
- Add success stories and performance metrics to website
- Clarify every product: what will we work on, what will you get

AUDIENCE STRATEGY

- Target women 30–39, 1–5 years in Denmark (confirmed by both studies)
- Build visibility on LinkedIn as primary discovery channel
- Create a low-commitment touchpoint for early-stage internationals not yet job-searching

JUNE 2026

THANK YOU
